Technology Camp Program

Alphapointe Technology Camp is a week-long day camp experience for middle and high school students with vision impairments. Campers will learn to utilize various technologies that impact academic development, improve internet navigation, and social networking knowledge and safety. In addition to hands-on technology skills, campers will have an opportunity to meet and work with a variety of mentors who have successfully utilized technology in their chosen careers as professionals with vision loss. **Students are selected for this program through nominations by Teachers of the Visually Impaired.** The cost to parents for Tech Camp is \$100 however; **the camper must attend all 5 days to receive a free gift** for completing camp.
